DECLASSIFICATION REVIEW by NIMA/DOD 4/11/00

MEMORANDUM FOR: Chief, Far East/China, DDP

25X1A ATTENTION : [REDACTED]
FROM : Chief, CIA/PID (NPIC)
SUBJECT : Nan-ning Area Study
REFERENCES : (1) Requirement No. DDP-376/64
(2) Project No. C 1372/64

1. This memorandum is in response to the referenced requirement which asks for an analysis of the City of Nan-ning, Communist China, with emphasis on the industrial and transportation complexes.

25X1D [REDACTED] provided the latest and best coverage of the Nan-ning area, and was used to produce the town plan. Enlargements which accompany this memorandum are also from this mission.

3. The annotated town plan locates the identifiable major industries, transportation facilities, and government and institutional buildings. The numerical designation assigned to each annotated area is keyed to the legend appearing on the town plan.

4. The enlargements are of those industrial and transportation facilities that are considered of primary importance. These photos are keyed to the town plan by the red annotated overlay to the town plan.

Area A - Unidentified Heavy Fabrication Plant (CIA/PID/IB-P-1312/64) - This facility is still under construction, but the main fabrication buildings appear to be completed. There is no indication that any component is in operation.

Area B - Unidentified Fabrication Plant (CIA/PID/IB-P-1310/64) - This complex is also in the final stages of construction, but none of the finished components seem to be in production.

Area C - Nan-ning Railyard (CIA/PID/IB-P-1309/64) - This transportation complex contains a classification yard, locomotive and car repair shops, and warehouses. Fourteen locomotives and more than 230 cars of all types were counted in the complex. A moderate amount of unidentified freight was observed in the southern and western sections of the yard.

SUBJECT: Nan-ning Area Study

Area D - Unidentified Chemical Plant (CIA/PID/IB-P-1313/64) - This facility is located in the newly developed industrial area south of the Yung River. It appears to be completed, but shows no signs of being in operation.

An industry of lesser importance, an unidentified fabrication shop, is located south of the chemical processing plant.

Area E - Thermal Power Plant and Water Works (CIA/PID/IB-P-1314/64) - The thermal power plant is in operation and is reported to furnish almost all of the power used in Nan-ning. An unidentified heat processing plant is also located nearby. No activity was observed at this plant or at other small unidentified industries located in the vicinity.

Area F - Beet Sugar Refinery (CIA/PID/IB-P-1311/64) - This plant is new and appears to be finished. No indication was found that the plant is in production. Alcohol will also be produced at this plant.

5. Nan-ning has the usual amount of small miscellaneous industries, but no attempt was made to include these in this study. Only the larger and more significant industries, transportation facilities and government buildings are contained in this report.

6. The photo analyst assigned to this project was [REDACTED] who may be contacted on extension 2547 should you have any further questions regarding this requirement. This memorandum and enclosed graphics complete this requirement.
